

Instruction Sheet for Semester Project Submission

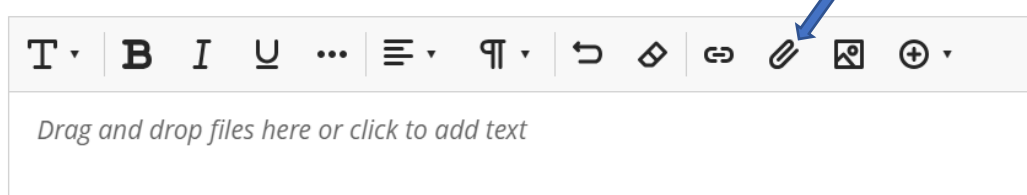

- i. The semester project submittal link is in the “Project Rubrics and Submittal Link” folder.
- ii. There should be only one compiled continuous document per group in pdf, Microsoft word or Latex i.e [Cover page for Part A + Part A report] + [Cover page for Part B + Portfolio #1 report] + [Cover page for Part B + Portfolio #2 report] + [Cover page for Part B + Portfolio #3 report]
- iii. There should be only one submission made per group by an authorised group member chosen by the group.
- iv. Avoid the use of AI or a direct copy and paste from random internet sources as submission is via “Turnitin”. Turnitin similarity should be $\leq 15\%$. When you are flagged for your own content, name, old UP materials e.g. previous works submitted by you etc we shall ignore those but if you are flagged for the works of other persons resulting in a high similarity score, you will need to revise your write up. This includes previous years BSS projects amongst other resource materials online.

Regarding AI flagging, we are aware that the flagging software can be erroneous in its detection approach for AI assisted writeups. Hence, we shall focus very much on the pattern of AI flagging across the report covering Part A and Part Bs. AI enhancement is anticipated to be 0% however, we are aware this may be unrealistic hence, we shall apply our human detecting abilities to be sure any AI flag is erroneous prior to making a judgement.

- iv. Please, follow the submittal link below hopefully, there shouldn't be any problem uploading your report.
